Select glove material based on the penetration time, rates of diffusion and degradation.
The selection of suitable gloves does not only depend on the material, but also on further marks of quality which may vary from manufacturer to manufacturer.
The exact break through time has to be found out by the manufacturer of the protective gloves.
 - b. **Other:** Use appropriate protective clothing.
3. **Respiratory protection:** In case of adequate ventilation, respiratory protection is not needed.
In case of insufficient ventilation, use appropriate respiratory protective device.
